YUP; faux doors whose surfaces are molded with recesses to simulate wood grain are commonly coated with a stain or paint, then wiped so only the vallies are colored. Try 427/256+, especially 261,262,267,274. I also agree with your model analogy. You could alos try CL 434, around sub 81 where I occasionally find funky stuff. Good luck,
Fred

yikes, this seems to read on painting any plastic parts (ie - model cars and airplanes) and wiping excess paint. Have you tried google? this is very artsy crafty.

Fred, do you have any other ideas?

Tim--

When you get a chance, would you take a look at 10/686,281?

It's one of those cases where I think I should be able to reject the remaining claims, but I haven't been able to find art that fits.

I'm hoping you might have a different perspective.

Thanks!

P.S., the case is currently after-final and Sun. is the 10-day mark, so I'd like to have an action prepared for counting on Mon.
